
(a) Field on a continuous domain
f(x, y) = 10 + 5 sin(x/3) cos(y/4)
7
9
11
13
(b) Raster 10 × 10
Sampled at centers; constant within a cell
(c) TIN from irregular samples
f values at vertices; linear interpolation
(d) Set of identified entities
Separate example: regions, line, points
